

Dev Panchal

devpanchal465@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#) | India (Open to Remote UK)

PROFESSIONAL SUMMARY

CSE student and fast learner with hands-on experience building and shipping full-stack web applications using AI-assisted development tools (Cursor, Copilot, Claude). Skilled in integrating LLM-powered workflows, APIs, and generative AI features into real-world products. Proficient in Python, JavaScript, React.js, and prompt engineering. Comfortable researching, evaluating, and iterating with new AI models and tools rapidly. Eager to contribute to a UK-based AI team as a remote developer.

TECHNICAL SKILLS

AI & LLM	Generative AI Development, LLM Evaluation, Prompt Engineering, Claude / GPT APIs, AI-assisted coding (Cursor, Copilot, Claude)
Machine Learning	Python (ML), model evaluation, AI workflow integration, API integration
Languages	Python, JavaScript, TypeScript, C, C++
Frontend	React.js, HTML5, CSS3, Tailwind CSS, Responsive Design
Backend & DB	Firebase (Firestore/Auth), MySQL, REST APIs
Tools	Git, GitHub, VS Code, Vite, Vercel, Netlify, Linux

PROJECTS

AI Dashboard | [React.js](#) · [Chart.js](#) · [Generative AI](#) · [Vercel](#) | [Live Demo](#) | [GitHub](#)

- Built and shipped a responsive AI-powered analytics dashboard using Claude/GPT API prompts to generate insights, with interactive Chart.js visualisations achieving 80+ Lighthouse performance scores.
- Designed and prototyped LLM-powered data summaries integrated via API; debugged and iterated on AI-generated code to understand behaviour and improve reliability.
- Shipped end-to-end: from brief to deployed product on Vercel — modular React architecture with high-availability access.

Smart Inventory Management System | [Firebase](#) · [Firestore](#) · [Python](#) · [Cloud](#) | [GitHub](#)

- Developed a cloud-based inventory system with Python scripting for automation; used AI coding tools to accelerate feature delivery and evaluate code quality.
- Integrated Firebase Firestore for real-time data sync with full CRUD functionality; delivered mobile-first UI with zero downtime and seamless data integrity.

Notes – Academic Resource Platform | [React.js](#) · [Firebase Auth](#) · [TypeScript](#) · [Prompt Engineering](#) | [Live Demo](#)

- Applied prompt engineering techniques to generate and structure academic content dynamically; integrated Google OAuth via Firebase Auth.
- Built intelligent filtering (branch/semester) with localStorage persistence; researched and evaluated AI content tools to improve recommendations.

EDUCATION

B.Tech – Computer Science & Engineering

Central University of Haryana, India

Nov 2022 – Aug 2026

CERTIFICATIONS & ACHIEVEMENTS

- Frontend Web Development with React – Udemy [View Certificate](#)
- Python (Basic) – HackerRank [View](#) | SQL (Basic) – HackerRank [View](#)
- Actively follows AI research, model releases, and tools (Cursor, v0, Replit, Claude Code); regularly experiments with new LLMs to evaluate capabilities.
- Achieved 80+ Google Lighthouse scores for performance and SEO across all personal projects.
